

## HUGE – LIGHT – ABSOLUTELY WIND-PROOF

Our Top Design golf umbrella is an innovative sporting device developed by GOLFARTLINE, especially created for you because playing golf should not be constrained by weather conditions. And that's why you have already assembled an umbrella holder to your trolley.

### »THE ART OF STAYING DRY«

The sophisticated construction of the Top Design golf umbrella ensures that you and your golf bag stay dry.

The umbrella holder mounted to your golf bag lets you take out your umbrella easily and without any fuss.

Even a stiff breeze turning your Top Design golf umbrella upside down is not a problem: you turn it right back again and fold it normally.

During your play put the golf umbrella back into the aluminium protection case. Because of its inbuilt water-flow mechanism – which you can either open or close – the water will drain off thus ensuring that your golf bag stays dry on the in- and outside.

The overcoat for your golf bag is guaranteed waterproof – after all your sports equipment deserves the best rain protection.

When using your golf carrying bag put the protection case with the golf umbrella in your bag. Using your Top Design golf umbrella ensures that you and your bag stay pleasantly dry even when it's raining heavily.

And if the sun shines after rain you don't need to put your Top Design golf umbrella into its case: it protects you against sunlight as effectively as against rain.

Please let your Top Design golf umbrella dry before stowing it in the aluminium protection case to avoid potential mould.

## HUGE – LIGHT – ABSOLUTELY WIND-PROOF

Another grand innovation by Golfartline:  
TOP DESIGN golf umbrella with aluminium protection case

### »THE ART OF STAYING DRY«

The compact aluminium protection case is elegant as well as an effective shield against sunlight – and that is yet another premiere.

This unique high-tech material ensures that your Top Design golf umbrella is a reliable and essential partner – no matter which weather conditions.
